

SMRT Digital Learning Solutions Fuel Tech Literacy

SMRT Digital Learning Solutions

- DL Program Pack
- DL Start Pack
- DL Blend Pack

Are You Prepared for Digital Learning Mandates?

Digital learning is a relatively new and complex phenomenon that requires a shift in how programs deliver instruction — and integrating, **correlating** and **contextualizing** with digital learning tools can present a significant obstacle. To help you navigate these challenges, SMRT has developed a range of solutions that support the development of new programming **without disrupting** existing processes. Each SMRT Focus Pack under the Digital Learning Solutions umbrella builds upon the solid foundation of process management, staff development, and data collection delivered by our SMRT Core™ solution — yet each one also adds tremendous depth to each area of focus. From direct and blended learning to custom hybrid and distance programs, SMRT Digital Learning Solutions give you the flexibility to choose one or more Focus Packs to smoothly and efficiently **integrate** digital and distance learning strategies into existing frameworks.

Digital Learning in the 21st Century

SMRT works with you to incorporate new e-learning tools such as Plato, Aztec, and GED Academy, among others, into existing instructional strategies.

Why SMRT?

- » Sustainable Solutions
- » Ongoing Involvement
- » Targeted Process Management

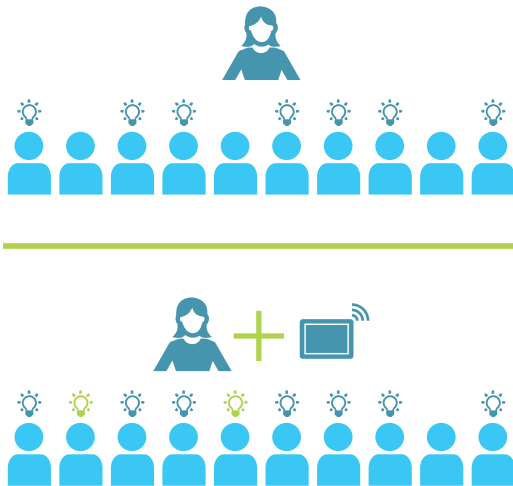

What are the outcomes with SMRT Digital Learning (DL) Solutions?

- » Programmatic Increased Digital Literacy
- » Comprehensive DL Strategies
- » Increased Staff Capacity
- » Higher Program Efficacy

Tighten Your Focus with SMRT

Find Your Ideal Blend of Digital Learning and Direct Instruction

As digital learning mandates compel programs to embrace new instructional technologies, the SMRT Process Management Team works with you to transform a potential disruption into a valuable extension of your program. SMRT Digital Learning Solutions blend your existing direct instruction processes with new digital learning tools that satisfy mandates like WIOA while supporting your program goals.

While our SMRT Core™ solution already offers robust process management, staff development, and data collection functionality, each Focus Pack adds even more depth and dimension to your program.

Digital Learning Solutions Challenges Addressed:

-  Technology Efficiencies
-  Data-Driven Strategies
-  Improved Processes & Communication
-  Sustainability
-  Proven and Promising Practices
-  Do What Works

Start at the Core. 

Digital Learning Solutions

DL Program Pack

This custom solution is designed to address the unique goals of each program. SMRT takes a holistically collaborative approach to each engagement, assessing all digital learning practices and processes with your team before developing a plan to **create and launch** new processes. Once your program's new digital learning plan is adopted, our team focuses on **sustainability** through ongoing staff development for administrators and teachers. We deliver **multiple avenues** of support, including on-site training, off-site webinar training, on-site coaching and mentoring, and off-site coaching and mentoring.

» Challenges Addressed

Technology Efficiencies, Data-Driven Strategies, Improved Processes & Communication, Sustainability, Proven and Promising Practices, Do What Works

» Projected Outcome

Programmatic Increased Digital Literacy, Comprehensive Distance Learning Strategies, Increased Staff Capacity, Higher Retention, Higher Program Efficacy, Improved Student Outcomes

» Time to Implement

6–12 Months

» Minimum Engagement Period

1 Year

DL Start Pack

The DL Start Pack is our fastest, most affordable way to implement digital learning courseware focused on **enhancing** direct instruction on site in your existing computer lab. The SMRT team will work with your program to incorporate e-learning tools to augment **direct instruction**, maximizing opportunities for integration and flexible learning. SMRT does not recommend changing direct instruction appreciably at first; instead, we suggest adding digital learning tools incrementally to focus on core areas or workforce **employability skills** so that educators and programs may gradually adjust to these new tools.

» Challenges Addressed

Technology Efficiencies, Data-Driven Strategies, Improved Processes & Communication, Sustainability, Proven and Promising Practices, Do What Works

» Projected Outcome

Programmatic Increased Digital Literacy, Comprehensive Distance Learning Strategies, Increased Staff Capacity, Higher Retention, Higher Program Efficacy, Improved Student Outcomes

» Time to Implement

1–2 Months

» Minimum Engagement Period

1 Year

DL Blend Pack

If customization and blended learning is a priority, the DL Blend Pack is the clear choice. We work with your team to design a digital strategy to enhance reading, writing, math, life skills, or technology literacy. We then deliver custom **e-learning** curriculums with lesson plans for direct instruction that are aligned to those curriculums. This pack also includes comprehensive **process management**, drafting of all curriculum documents, and guiding the articulation of processes that support implementation. Upon approval of your plan, our staff members provide **ongoing support**, both on and off site. This is a comprehensive solution that targets curriculum, digital learning integration, streamlining processes, and programmatic development toward blended learning goals.

» Challenges Addressed

Technology Efficiencies, Data-Driven Strategies, Improved Processes & Communication, Sustainability, Proven and Promising Practices, Do What Works

» Projected Outcome

Programmatic Increased Digital Literacy, Comprehensive Distance Learning Strategies, Increased Staff Capacity, Higher Retention, Higher Program Efficacy, Improved Student Outcomes

» Time to Implement

3–9 Months

» Minimum Engagement Period

2 Years

Every new engagement requires our SMRT Core solution — your first and most critical step to increasing capacity while ensuring **valid data collection**.

» Included SMRT Core Components

- Process Management**
- Staff Development**
- Data Collection Web Portal**

» SMRT Core Enhancements

- Advanced Analytics Pack**
- Case Management Pack**
- Early Warning System**
- SMRT Focus Packs** (see back panel)

The SMRT Core Process: From Discovery to Sustainability

The SMRT Process Management team will focus on what makes each school program unique. While there are many similarities involved with each SMRT engagement, every client is different — which is why we work with you to develop an intelligent implementation strategy that takes these important differences into account.

SMRT Core™ Phase 1

Discovery and Planning

During the first 90 days of each SMRT engagement, SMRT Process Management and Professional Development teams will devote 50–80 hours on data collection, priming, and training.

Step 1: Informed Discovery through Collection of Valid Data

Step 2: Process Management and Professional Development Planning

Step 3: On-Site Staff Training by SMRT Specialists

Step 4: On-Site and/or Remote Data Collection

Step 5: Perception Testing

Step 6: Collaborative Planning with Teachers and Administrators to Draft Implementation Plan

Customize to Maximize

During Phase 1 of a SMRT Core engagement, when you weave in one or more of the **SMRT Core Enhancements**, such as the DL Program Pack, DL Start Pack, and DL Blend Pack, you add substantial support and focus in each area.

SMRT Core™ Phase 2

Implementation and Sustainability

Steps 7–14 will come at different stages, in different orders, and at different intensities as required. SMRT staff will devote 120–140 hours to implementation, evaluation, and support during this phase.

Step 7: Targeted On-Site Professional Development Training

Step 8: Coaching and Mentoring to Prepare for Implementation

Step 9: Facilitate and Oversee Implementation Plan

Step 10: Evaluation of Implementation Using Data Collection and Perception Testing

Step 11: Planning Assessments for Teacher and Administrator Performance

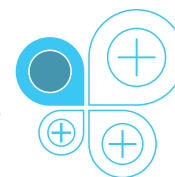

Step 12: Ongoing Professional Development for Individual Instructors and Groups

Step 13: Ongoing Process Management and Professional Development for Administrative Staff

Step 14: Ongoing Support for Implementation

Fortify Your Focus in Other Areas with These SMRT Focus Packs

In addition to the Digital Learning Focus Packs outlined here, SMRT gives you the flexibility to expand your capacity in targeted areas at any time by choosing one or more enhancements. SMRT Core required.
